Remanufactured Automotive Electronics

Identification Catalogue  
2009/2010

Remanufacturing solutions  
for transportation electronics  
[www.injectronics.com.au](http://www.injectronics.com.au)

# Injectronics

The Advantage you can expect by using **Injectronics**:

- ISO 9001 Quality endorsed remanufactured automotive electronic components
- Technical support helpline
- Trial units available
- Prompt testing and repair service
- Huge and always expanding range of products
- Full warranty support
- Focus on the future with investment in R&D
- Authorised distribution network

**Remanufactured Automotive Electronics**

People use Injectronics because:

# Remanufacturing solutions for transportation electronics

## Largest Range

Injectronics has Australia's largest range of the highest quality remanufactured automotive electronic components in stock. This includes an extensive range of Australian, Asian, and European parts, as well as new parts.

## In Stock, Ready for Immediate Delivery

The Injectronics range is in stock and available for immediate delivery to satisfy your customer without delay.

Distributors

We have distributors that stock and support our products Australia-wide, to satisfy your requirements quickly and efficiently.

Competitive Pricing

Our pricing structures enable you to increase your competitive edge, whilst providing you with generous returns.

## Free Technical Support

As part of Injectronics commitment to excellence, our technical department is always available to assist you or your customers with any automotive electronic problem. Our qualified and experienced technicians

will advise on numerous makes, including Japanese, European and Australian built cars.

## Trial Unit Availability

Injectronics provides time and cost saving 'trial units' to test and help diagnose your customers vehicle problems.

## ISO 9001:2000 Quality Endorsement

Injectronics' focus and dedication to supplying the highest quality remanufactured products is evident by the achievement of its quality accreditation. This endorsement is unique to the industry and provides customers with peace of mind.

Injectronics has earned a commendable reputation in the automotive electronic repair industry for excellence in quality.

## The Injectronics Advantage

### Satisfaction Guaranteed

All Injectronics remanufactured products are covered by a 'hassle free' satisfaction guaranteed warranty.

*All remanufactured units come with our 2 year 'Peace of Mind' no fuss warranty.*

### Trial Units

As part of our continued service to the automotive industry, we are able to offer some of our remanufactured parts on a 'trial basis' to assist customers with diagnosing difficult vehicle problems.

This economical service will save you and your customers a lot of time, money and frustration, and is extremely useful when the vehicle has an intermittent problem.

In all cases, please talk to our technical department before ordering the part from your local Injectronics stockist. Our technical department may be able to solve your problem over the phone.

## Trial Unit Process

- Call Injectronics and talk to our technical department to discuss the vehicle's problem. If necessary, order a trial unit from your local Injectronics stockist. They will invoice the part and send it out to you.

- If the part solves your customer's problem, simply return the old core unit, together with the necessary documentation, to your place of purchase.

- If the trial unit does not solve your customer's problem, send the part back with the original invoice and a note explaining that it was a trial unit. When the part arrives back at Injectronics, we will bench test the returned unit to confirm its correct operation.

- If the unit tests okay, your Injectronics stockist will invoice you a 'Retest & Repackaging Fee' plus any freight charges. A credit will be processed for the original purchase.

## Technical Service Helpline

As part of Injectronics service to you, we are able to offer free technical assistance via phone, fax, email or our web site.

Thousands of callers have benefited from the knowledge and expertise we have accumulated in our field, over many years. Our team of technical advisers can provide valuable technical services that include:

- wiring diagrams
- fault code interpretations
- adjustment procedures
- information on common reported faults
- testing procedures
- technical bulletins

*Please note: This service is for trade customers only. We are unable to deal with retail customers who do not possess the required expertise or testing equipment.*

*Before you call for advice, please make sure that the following engine problem tests have*

*(where applicable) been completed:*

- Fuel pressure and fuel flow
- Injection pulse
- Ignition/spark
- Power supply's to ECM
- Earths to ECM
- Earths to body
- Earths to engine
- Fault codes (including pass code)

*Injectronics do not test vehicles at its facilities, only parts are tested.*

\*\* Special notes for purchasing of BA- BF, Territory PCM \* Units require variant coding programming to suit different variations for each vehicle.  
 1/ Identify ABU or ASU number on PCM. 2/ Customers with OE Programming capabilities can order ABU XXX part number and program to vehicle.  
 3/ Customers WITHOUT OE programming capabilities to contact Injectronics for programming options.

## The past, present and future of Injectronics

Injectronics had its origins in the early 1980s as a business which serviced and repaired late model fuel injected vehicles. Managing Director, Rex Vandenberg, soon found the need to invest heavily in modern equipment and specialised training for staff. They soon became known as the fuel injection specialists within the automotive industry and began troubleshooting for many other workshops and dealerships within the Melbourne area.

The manufacturers of automotive electronic components made the bold statement that these parts were 'a non serviceable item' and could only be purchased new. Motivated by the challenge of this statement, and the high cost of replacement parts, Rex and his brother Frank, started to research and repair electronic modules on vehicles that were brought to their workshop. They soon had many inquiries from other workshops and dealerships to supply these parts, and this led to repairing and stocking electronic control modules so that they would be available on an exchange basis.

The repair or remanufacture of electronic modules is a backward engineering feat, as the manufacturers of these parts do not supply any information such as circuit diagrams or component specifications. Rex and Frank spent many hours after work, often late into the night, researching and recording the information they found, and developing repair and testing procedures.

Injectronics has grown to become Australia's leading supplier of remanufactured automotive electronic components and remains committed to delivering customer service and the highest product quality. This growth has come through the training of existing staff, and employment of more qualified, experienced and specialised staff, all focused on servicing the needs of customers.

Injectronics has established a network of agents who stock our products and support the services we provide. Injectronics fully supports our agents by providing training to their staff on our products and services. We will continue to select more agents around Australia in order to provide an even faster and more efficient service.

Injectronics continues to develop more efficient testing and repair procedures in the remanufacture of our products. This involves continually upgrading our electronic testing equipment and has led us to develop our own fully automated air flow bench to test and calibrate air mass sensors and air flow meters. We have also designed and built a Virtual Automotive Simulator (VAS) for the computerised testing of automotive electronic control modules. Injectronics has been awarded for its V.A.S design, from the Society of Automotive Engineers. An electronic control module is connected by way of a harness to a simulator which communicates with a computer. The operator then selects the appropriate electronic control module they wish to test and the VAS performs a fully automated test of the various electronic control module functions and then informs the technician of the result.

Exporting of products and services is another expanding area for Injectronics. We currently design circuit boards which are fitted to automotive electronic components such as electronic control modules, air mass meters, etc. These circuit boards are fitted into components to replace unobtainable hybrid sections that are part of these electronic components. These circuit boards are exported worldwide.

83

Injectronics looks forward to a future involving automotive electronic components that are becoming increasingly challenging to repair.

Through continually increasing our research and development, we will maintain our position as Australia's leading automotive electronic component remanufacturer.

We will only achieve this by maintaining our focus on what you, our customer, wants.
