Remanufactured Automotive Electronics Components

## PRODUCT SERVICE INFORMATION

Document number: P0013

For further technical information regarding testing, repairs or to search for New or Remanufactured Automotive electronic products, please visit [www.injectronics.com.au](http://www.injectronics.com.au), call our office on (+613) 8792 6999, or email [sales@injectronics.com.au](mailto:sales@injectronics.com.au)

Vehicle: Holden Commodore VY - VZ

Subject: Body control modules

This reconditioned change over body control module is supplied with 2 x pre-programmed key fob.

**VY - VZ modules require the BCM to be matched / married to the PCM / PRM. This can only be done with the aid of Tech 2 or late generic scan tools.**

Please note that the four digit radio code must be read from BCM or from security card and entered into the exchange BCM with scan tool.

A 6 digit security code is supplied with every change over body control module.

Please note that any existing original/spare key fobs cannot be used with the exchange BCM once the exchange unit is fitted to the vehicle. Key fobs can only be programmed once and are locked to a BCM from then on.

**All original/spare key fobs should be returned with the faulty exchange BCM to your supplier and form part of your return core credit.**

If you have any queries regarding the above process, please contact the Injectronics technical department for further info.
